New Japanese Everblooming Hollyhocks.

Flower the first season from spring-sown seed. Bloom profusely from July until frost. Again has the flower fairy tapped at the door of the Flowery Kingdom—the realm of the Dragon—the land of the Cherry Blossom and of Madam Chrysanthemum—and behold this wonderful everblooming Hollyhock is given us. The art and the skill of these people, who mold and lead nature at will, as these people seem to do, are marvelous. They work, and they play, and they worship among their flowers from the blossoming of the Cherry to the Chrysanthemum. In these superb Hollyhocks there are the tints of dawn and the setting sun—blazing crimsons, scarlets and maroons, golden yellow and lemon tints. Start seed early and up to May. When planting out, give deep and rich soil, and water well when dry. Pick off seed pods as fast as formed. **Packet, 60 seeds, 10c.**

Phebe J. Marshall

Hibernia, Dutchess Co., New York

Garden Huckleberry. (*Solanum Nigrum*.)

A new fruit from Washington State, and most desirable introduction of late years; will outyield any other berry grown. Grows from seed and ripens its crop same year. Berries jet black, four times the size of huckleberries; for pies or jams it is the equal of any other fruit grown. Plant same as tomato in box or pan, and, when danger of frost is over, set out 2 x 4 feet. When jet black stew thirty minutes; make very sweet. Better than wild huckleberries for pies, jams, jellies, sauce and canning. Like cranberries, these will keep nice and fresh for months for winter use or market. This new fruit is insect proof. A light frost improves the fruit.

Packet, 100 seeds, 10c.; 3 for 25c.

Howard's Star Petunia.

The most distinct and desirable Petunia ever offered. Flowers large, $2\frac{1}{4}$ inches in diameter, and the most prolific bloomer I ever saw. The body color is a dark rich velvety maroon. Starting deep within the throat are the five rays of a star, of a pinkish-white in the centre, shading to a decided pink at their margin, where they blend into the maroon. Their outline, however, is sharp and decisive.

Packet, 100 seeds, 5c.; 3 for 12c.

Shasta Rosa Poppy.

The Crimson Winter Rhubarb.

The earliest of all Rhubarb, and fit for use not only in spring, but all through the summer and fall. In the Southern and Pacific States it may be used all the year round. In winter it is particularly fine. Color, bright crimson, except the new stalks on young plants. It forces readily in the greenhouse or cold frame. It is of excellent flavor, and the stalks are so tender that it is not necessary to remove the skin. It grows easily and rapidly from seed, making stalks for use the second year.

Packet, 20 seed, 8c.; 2 for 15c.

GROW THIS NEW VEGETABLE FROM SEED.

One packet will give plants enough for a family.

Burbank's "Shasta Rosa" Poppy.

The Poppy is always a popular favorite. Its freedom of growth, beauty and lovely showiness make it an ideal garden flower. This new strain of the Shirley Poppy produced by Mr. Burbank, and bearing the name of his California home, combines all the delicate beauty of the original Shirley types, and with these the whole flower in all its petals is beautifully crimped and fluted as illustrated.

Packet, 5c.; 3 for 12c.

Jack-and-the-Beanstalk Vine

(*Pueraria Thunbergiana*)

Like the magic Bean vine of the fairy tale, this wondrous new vine, with ordinary treatment, will grow 70 feet in one season, turning everything it covers into leafy loveliness, and filling the air with the fragrance of its large clusters of wistaria-like blossoms.

In three months this wonderful Chinese Vine progresses as much as most vines do in five years. Adaptable to porches, arbors, fences, rockeries, old trees, etc. Perfectly hardy; lasts twenty-five years or more.

Packet of 15 seeds, 10c.

Good Plants, 20c. each; 3 for 50c. postpaid.

Extra large Plants, 40c. each; 3 for \$1.00, postpaid.

Floral Butterfly Plant.

No plant in cultivation possesses so great a number of superior points as do these two beautiful new Commelinas. Plants are of a graceful, trailing habit, superb for carpet bedding or for hanging pots. In pots it blooms every day in the year. In the garden, from May until frost, showing daily scores of large winged butterfly-like blossoms. Color (No. 1.) the most beautiful blue to be found in any flower. A shade so exquisitely lovely as to baffle description. Thrives in sun or shade, wet or dry, rich or poor soil; as easily raised as a weed from seed or cuttings, grows rapidly, flowers at once, and propagates easily. Blooms in 50 days from seed.

Packet, 10c.

Gypsophila

Paniculata (Baby's Breath).

A mass of the finest little leaves and branches, covered with tiny white star-shaped flowers.

Packet, 5c.

Gypsophila Paniculata (Baby's Breath).

Eschscholtzia

(California Poppies)

The Golden West

Flowers measure $3\frac{1}{2}$ to 6 inches across, and are bright yellow and orange. Some are flat and wide open, some saucer-shaped, others very deep with flaring edges. In some the orange blotch almost suffuses the whole flower, in others it runs into the yellow in fine pencil lines. Gorgeous beyond description. **Large Packet, 200 seeds, 5c.**

Rosy Morn. A distinct new shade, producing flowers of a form hitherto unknown in the Eschscholtzia species. The rosy, white petals are delicately channeled or fluted with tiny folds radiating from the center and richly adorned with a soft primrose yellow hue, enhancing the beauty of this charming flower. **Packet, 5c.**

Douglasi. I confidently recommend this new California Poppy on account of its extraordinary early flowering, being in full bloom at least a fortnight earlier than the other kinds. The color of the flowers, which are from $1\frac{1}{2}$ to $1\frac{3}{4}$ inches across, is a pure golden yellow with a dark yellow center. Foliage glaucous and finely divided. **Pkt., 5c.**

Special Mixture. California Poppies. This mixture includes all the above single and double sorts, and is the finest and most complete mixture of these charming annuals in existence. **Packet, 5c.; 4 for 15c.**

The Golden West.

Stokesia Cyanea

(Corn Flower Aster)

This beautiful native hardy plant is one of the most charming we have. No garden, large or small, should be without it. As a single specimen or group in the hardy border, it makes for itself a place that cannot be filled by any other hardy plant, while for beds or masses of any size it ranks with the Phlox, Pæony and Iris. It is of the earliest culture, blooming the first year from seed, and succeeding in any open sunny position. The plants grow from 18 to 24 inches high and begin flowering in July, continuing without interruption till late in October to produce their handsome lavender blue centaury-like blossoms, which are highly valuable for cutting, supplying a shade of color not plentiful at any season of the year.

Good Blooming Plants, 15c., each; 2 for 25c.

Seed of Stokesia Cyanea

It is very easy to raise from seed, and will flower the first year if sown early.

This New Emperor strain is a very great improvement on the older type in its increased size of flowers, their improved shape and larger variety of colors, and more than all else in their singularly beautiful veinings of gold. PURPLE FEATHER GRASS.

This is undoubtedly one of the most ornamental decorative grasses ever introduced, and will be found as useful for room, hall or table decoration as many a palm, while having the advantage of rapid and vigorous growth, and being easier to manage.

Its graceful, narrow curving leaves produced by the hundreds in succession, are overtopped by most elegant purple feather plumes a foot long, which by themselves are quite ornamental as vase decorations and can also be used for dry grass bouquets.

Sown as late as March, it makes a bold plant, unlike any other in the garden, always a feature of attraction. If grown in pots, no one could wish for anything more graceful. This novelty has been greatly admired wherever shown.

Pkt., 50 seeds, 5c.

The flowers of these New Mammoth Morning Glories are as large as moonflowers, often 6 inches across, and the petals of many are beautifully fringed and ruffled. The vines begin to bloom when 2 to 3 feet high and continue to bear flowers by the hundreds until frost. The flowers are not only large but superior in every way to the common kind. The petals are thicker, which gives the colors a deeper and richer look. The flowers are strangely and beautifully marked and colored in a way never seen before. Snowy throats with blood red border, velvet plum bordered with white, snow-white through all possible shades of blue, and of red from palest pink to darkest reds and purples. They are streaked, mottled, striped, marbled and bordered in wonderful fashion, and sometimes show rare shadings of ash grey, bronze, brown and slate-blue, colors rarely found in any other flowers. To gain time start the seeds in small pots in the house in March or April, and plant in a warm, sunny place. Pkt. 20 seeds finest mixed **5c.**, $\frac{1}{4}$ oz. **15c.**

NASTURTIIUM

The People's Flower of Flowers.

What a show these bright and dazzling beauties make? They are like a carpet of emerald and gold. One plant will brighten a home, and one seed at the doorstep will gladden your heart. Some say Sweet Peas—I say Nasturtiums give more for the care and money. Plant any way, and they grow without care. Plant, and plant liberally.

JUPITER, KING OF NASTURTIIUMS.

A New Giant Flowered Climbing Nasturtium, originated by Mrs. Theodosia B. Shephard. "As beautiful as an Orchid," has been remarked of this magnificent flower, the precursor of a new race of Giant Nasturtiums.

The plants are very strong and vigorous, with large, dark green foliage. The great, rich, pure yellow flowers measure $3\frac{1}{2}$ inches across. The petals are large ($1\frac{1}{2}$ inches in diameter); they overlap, and are exquisitely and deeply crinkled like crepe. The flowers are very fine for cutting, resembling Orchids in their rich beauty. A grand and distinct variety. **Packet, 10c.; 3 for 25c.**

SUNLIGHT COLLECTION CLIMBING NASTURTIIUMS

... OF NEW

Price of any of the following: Pkt., 5c.; $\frac{1}{2}$ oz., 10c.; oz., 15c.

New Tall Nasturtium CHAMELEON. This variety was raised at the same time as the Dwarf. It is exactly the same, only it is a climber or trailing sort. It is absolutely new, and is very fine. It should be tried by all.

PRINCESS VICTORIA LOUISE. This is surely one of the most beautiful and remarkable varieties of climbing Nasturtiums. The large and nobly-shaped flowers are cream white, with orange scarlet blotches, the calyx and the spur being of a pure orange red, which is a rather rare color among the annual Nasturtiums. Sometimes the flowers are edged with red. The foliage is of a fine dark green color.

FIREFLY. Splendid and distinct variety, with very large flowers of dark orange, spotted and flamed blood red; the spur is also blood red; foliage and stems dark.

MARGUERITE. Flowers large, pale yellow, spotted and flamed blood red; spur blood red; foliage and stems dark; very effective.

PRIMROSE. Creamy white, with brown spots; large flowered. A charming variety.

SUNLIGHT. The flowers are clear, rich, golden-yellow, borne so profusely as to almost conceal the foliage. The petals are large and round, measuring more than $1\frac{1}{4}$ inches across, and are daintily crinkled. The flowers measure nearly 3 inches across. Its glowing color is wonderfully effective.

MOONLIGHT. This is the counterpart of Sunlight, except in color, which is an exquisite pale straw. It is as beautifully shaped as its brilliant companion, and has the same lovely crinkled effect in the petals.

CAPRICE. A profuse-blooming, extra large-flowered variety, with beautiful dark foliage. The flowers are wonderfully rich and brilliant in markings—showing many combinations of coloring. It is appropriately named *Caprice* from its remarkable character of frequently having most varied colored flowers on a single plant.

I sell 10 lbs. of mixed Pansy seed a year. It gives great satisfaction.

TUFTED PANSIES, The New Pansy-Violet.

As the new Pansies have never been offered in this country, I give the originator's description:

These new Pansies are called "**Tufted**," because a plant from a single seed will grow and enlarge into a clump or **tuft** of plants, which will live and bloom year after year, and send out "**runners**" like the Violet, hence the name, **Pansy-Violet**. They are a **hardy perennial** plant living out all winter, increasing and blooming continuously. They are **sweet scented**, like the Violet. The flowers are very large and of great substance, measuring 2 $\frac{1}{4}$ to 2 $\frac{3}{4}$ inches across. The colors are marvelous and endless in variety. Dark and bright, also delicate shades, zoned, pencilled and mottled in wondrous colors. And added to all this, a hardy perennial violet perfumed **Pansy**, increasing in size and numbers each year. Once planted—**always** "**A thing of beauty, a joy forever.**"

Everlasting Pea, "Pink Beauty."

Lathyrus Latifolius Var.

A hardy perennial that will bloom from seed the first year.

Hitherto the ordinary Red and White Everlasting Peas have been the only kinds in commerce. We have now an entirely new variety, the color of which is a delicately shaded pink on the standard, the lacing on the edge being paler than the center; the wings are deeper pink, of a very rich shade, giving it a very striking appearance. The trusses, as well as the individual flowers, are larger than the older varieties, and the character may be considered to be quite fixed. This novelty is an important addition to the few kinds of hardy perennial climbers, easily raised from seed, and is an invaluable plant for florists.

NEW VARIEGATED TUBEROSE.

This scarce variety has been neglected because it has been so high in price. Few have ever grown, and not many people have ever seen it. It is a plant of superior excellence, and I have put the price within the reach of all. The leaves are bordered with a conspicuous white band, making it a beautiful border plant. Flowers single, large, white, delicious fragrance, but not nearly so heavy as the double sort. The spike is graceful and is much more beautiful when cut than the other kinds. Blooms earlier and three weeks earlier than the doubles. The bulbs bloom year after year, while the others do not.

Price fine-blooming bulbs, 5c. each, 3 for 12c., 7 for 25c. By express, 50 for \$1.50, 100 for \$2.

HOW TO PLANT.

Set out about the time you do Coleus, in rich, warm soil. Firm the soil around the bottom of the bulb with your hand, and have the top of the bulb just covered with dirt. When the flowers begin to open, if you take the plant up and put it in a pot or box and place it on the piazza or out of the sun and storms, all the flowers will open very white and full.

Lemon American Wonder.

IMPORTED JAPANESE FERN BALLS

THE great popularity that these most decorative subject attained the past season is not surprising, as they are the most striking introduction of recent years. The Ferns are gathered in a dormant condition by the Japanese and the roots and fronds expertly interwoven into compact balls. Their culture is most simple. All that is required is a soaking in a tub of water and hang to drip in a moderately warm and somewhat shaded place. This is to be repeated daily until growth starts, then see that they are kept moist by sprinkling. To watch their development is most interesting; the growth is very rapid, new and strange kinds appearing daily and beauty increasing with age. For arbor or piazza in summer, and for window and church in winter, this is one of the prettiest decorations imaginable.

The dry balls are received in the winter and sent postpaid for **75 cts. each; 3 for 2.00;** smaller size, about 5 in. diameter, **50 cts. each.**

TRULY a wonder, for no other lemon ever produced such enormous fruit or bore so freely. The plants grow rapidly and soon make shapely little trees. Fruit is very handsome as well as useful. May be used anywhere that ordinary lemons may be used, and one of these is equal to 8 or 10 common lemons. Has very thin rind for so large fruit and its acidity is unsurpassed. Highly recommended for lemonade and all culinary purposes.

**15 Cents Each, 2 for 25 Cents;
2-year plants, 25 Cents each,
postpaid.**

The great demand for this plant has caused spurious strains to be substituted. I guarantee these I offer to be the genuine.—

**AGERATUM

Its peculiarity consists of both blue and white being combined in the same flower, the center of the flower being white, encircled by a broad distinct zone of baby-blue. A particularly attractive and pretty plant, easily grown and a most profuse and continuous bloomer. The most distinct new bedding plants of the year.
Plants 10c. each; 3 for 25c.

**MEXICAN MOUNTAIN
BEAUTY.**

ANTIGONON LEPTOPUS.

Although introduced some fifteen years ago, this most beautiful vine is only just beginning to be appreciated, but it is now so highly thought of that some seedsmen are even illustrating it in colors. Few plants, indeed, are more delightful when in bloom—when it might almost be compared to a scarlet-flowering Wistaria. When thoroughly established, the roots send forth an abundance of bright green foliage, which is almost hidden by the long, dense wreaths of bright carmine flowers, lasting in beauty and perfection for weeks and months, a sight almost impossible to surpass. For porches, verandas, fences or trellises; for clambering over rocks or old trees, it will prove a grand acquisition. The roots are easily raised from seed and are quite hardy, with slight protection.

Roots that will bloom, 15c. each, 2 for 25c.; Seed, 8c., postpaid.

HYDRANGEA PANICULATA GRANDIFLORA

One of the finest hardy shrubs ever introduced, and in size and magnificence of bloom not excelled by any shrub in cultivation. The bush in time attains a large size, growing in beauty year by year. It is in the full glory of bloom from August until the middle or last of October, when every branch is crowned with an immense panicle of fleecy, pure white flowers, changing later to a pinkish hue, sometimes a foot long and nearly as broad at the base, presenting an aspect of majestic grandeur that absolutely defies description. Entirely hardy, very free-growing, a profuse bloomer, and thrives in all soils. It should have a prominent place in every garden, not only because it is such a glorious shrub, but for its flowers appearing at a time when few others are to be found.

The plants I offer have all bloomed this season, and will be pruned right for transplanting. 15c. each; 2 for 25c., postpaid.

It is easy to grow, and sure to bloom, and cannot be too highly recommended as one of the most showy and handsome ornamental plants ever introduced. The flowers are borne by hundreds, on long graceful nodding stems, just right for cutting. Do not forget to include it in your order; it is a plant that will please you.

OUR ROSE BED COLLECTION.

THE GREATEST BEDDING ROSES IN CULTIVATION.

They bloom continuously through the entire Summer.

Careful trials put it beyond the least question of doubt that these famous roses stand at the top of the list as the best Bedding Roses. The most admired ornamentation on our grounds the past season was a bed of these Roses. The large handsome flowers were produced in such amazing numbers as to make the bed a solid sheet of bloom. Plant a bed of these Roses and you will never have cause to regret it.

NEW YELLOW SOUPERT "MOSELLA."

This lovely new addition to the Soupert family we imported from Germany last season. It has the genuine dwarf-growing, free-flowering Soupert habit; produces beautiful clusters of very double, ball-shaped flowers which open like a Camellia. The buds are also very pretty. The color is a white tint on beautiful light yellow ground. A great addition to our Summer Bedding Roses.

Each, 10 cents; 3 for 25 cents.

CLOTILDE SOUPERT.

This now famous Pot and Bedding Rose (*Polyantha Tea*) was introduced in America in 1889. It is a cross of the free-blooming Polyantha Rose and a large flowered Tea, thus giving it, with all the free-blooming qualities of the former, the strongest growth of the Tea class. Its charming coloring, shading from pearly white to purest rose, double blossoms, delightful fragrance, wonderful vigor and freedom of bloom, combine to make it a most beautiful Rose.

Each, 10 cents; 3 for 25 cents.

"PINK SOUPERT."

We find this bright, new Rose a very free-flowering variety, much resembling Hermosa, but more double and flowering more freely; it shows the Polyantha blood in the full cluster of bloom, and it makes a handsome contrast, bedded or grown with the C. Soupert. The habit of the plant is almost identical with the C. Soupert, a rapid grower and quick to bloom.

Each, 10 cents; 3 for 25 cents.

1 each of the 3 kinds, 25 cents.

HARDY CLIMBING VINES.

AMPELOPSIS VEITCHII. (Boston Ivy.) A beautiful climbing plant. This is one of the finest climbers we have for covering walls, as it clings firmly to the smoothest surface, covering it smoothly with overlapping foliage, giving it the appearance of being shingled with green leaves. Each, 10 cts.; 3 for 25 cts.; doz., 80 cts., postpaid.

HONEYSUCKLES.

HONEYSUCKLE HEDGES. Some of our friends have conceived the idea of planting Honeysuckles along the division fences, and it is wonderful what pretty hedges they

make. Iron or wire fences are the best, but almost any kind is soon covered with a mantle of living green, making a very pretty and cheap border for lawns, drives, parks, walks, cemeteries, etc. Other climbing vines will answer the same purpose, but the sweet-scented Honeysuckles are both fragrant and beautiful. They should be planted two feet apart. Write for special low price in quantity.

TARTARIAN or BUSH HONEYSUCKLES. Red Tartarian, well-known and popular shrub for the lawn or garden; blossoms in May and June. White Tartarian, like the preceding, but with white blossoms. 15 cts. each; the two for 25 cts.

WISTARIA, CHINESE PURPLE.

The Wistaria is particularly valuable for training over buildings, second-floor verandas, and wherever tall growing climbers are wanted; it is a vigorous, rapid grower, and entirely hardy. The flowers are borne in long, pendulous clusters of lovely, rich, violet purple; deliciously sweet and exceedingly handsome; one of the very best climbing vines for verandas, balconies, etc. 10 cts. each; 3 for 25 cts.

NEW CLIMBING MOSS ROSE.

CUMBERLAND BELLE. The only Climbing Variety in existence. This is the forerunner of a new race of Roses, a grand true Climbing Moss Rose. It is of American origin, having been found growing in a private garden in the historic Cumberland Valley—a sport from that pretty Moss Rose Princess Adelaide, itself a strong, vigorous grower, which is wonderfully developed in the offspring, the original sport the first season having attained a height of over fifteen feet and had one hundred and eighteen buds and flowers on it at one time. The past season, planted side by side with Crimson Rambler and other rampant growers, it fully equaled them in vigor of growth. In color it is identical to the parent, a bright silvery rose, very double, the buds nicely mossed and exquisitely fragrant. Altogether a most unique and desirable acquisition. 20 cts. each; 3 for 50 cts., by mail.

CUMBERLAND BELLE.

New Dolichos. "Daylight." Fresh from Japan. Large Wistaria-like racemes of snow-white, sweet-scented flowers, followed by silvery-white seed pods. This is a quick-growing, vigorous plant. Very showy and desirable. Packet, 30 seeds, 6c.; 2 for 10c.; ounce, 20c.

Dolichos. Purple Soudan. Stems are of intense purple color, and the beautiful flowers that are produced during the whole summer, are of brilliant rose, contrasting strikingly with the dark foliage. Packet, 5c.; ounce, 20 cts.

1 Packet each of the three kinds on this page for 12c.

Wild Cucumber.

(*Echinocystis Lobata.*)

This is the quickest growing climber in our list. Grows wild, self-sown, in many parts of the West. It will grow 30 feet in one season. It is thickly dotted over with pretty, white, fragrant flowers, followed by an abundance of ornamental and prickly seed pods. For a trellis or pillar no annual vine is more chaste, and it will quickly cover an old tree, or an unsightly building.

Packet, 5c.; $\frac{1}{2}$ ounce, 15c.
